

“DRIVING A
NATURAL GAS VEHICLE (NGV)
SAVES QUALITY TIME EACH DAY — FOR MY FAMILY.”

Beth Barinek, NGV driver since 2002

“I live in Seal Beach and work near LAX.

That’s a long commute each way, each day, but since I purchased a natural gas (CNG) powered car, it really has made a huge difference.

Driving with CNG allows me to use the HOV or car-pool lanes on the freeways as a single occupant. That saves time I can devote to

my family. It also makes for less tiring, stress-free driving — and it saves money — I consistently pay less than motorists using gasoline or diesel.

Finally, driving with CNG is saving my family’s and everyone’s health because my CNG car is the cleanest-burning internal-combustion

engine in the world.

In 2002, I felt I either had to get a new house or a new job. Commuting had become that tough, but the decision proved easy — I got an NGV instead.”
