

“DRIVING A
NATURAL GAS VEHICLE (NGV)
SAVES OVER AN HOUR A DAY — FOR MY CLIENTS.”

Mark Byrne, NGV driver since 2002

“I live in the South Bay and work at my law firm in downtown Los Angeles, and I drive all over Southern California to different courthouses. That’s a lot of driving each day. But since I bought a natural gas (CNG) powered car, I save and save and save.

Driving with CNG allows me to use the HOV or car-pool lanes on the freeways as a single occupant. And

that saves an hour or more each day — time I can devote to my clients rather than to traffic.

And driving with CNG also saves money. I consistently pay less at the pump than motorists using gasoline or diesel.

Finally, driving with CNG is saving my family’s and everyone’s health because

my CNG car produces almost no emissions — hydrocarbon emissions are near zero. It’s the cleanest-burning internal-combustion engine in the world.

That’s a quadruple win — for me, my clients, my family and for everyone around me.”
