

# Why choose Clean Energy for natural gas fueling?

## In a word — reliability.

Why team with Clean Energy for natural gas fueling station design/build, operation/maintenance and fueling services? Because it's the best decision you can make to ensure that your vehicle fleet rolls out every day on time — and fueled. In a word — reliability.

### Only Clean Energy has:

- Delivered over 600 million gallons of CNG and LNG to customers
- Grown operations to fuel more than 20,000 vehicles daily
- Built over 200 stations
- Installed and operated over 500 compressors
- Managed over 50,000 hp of compression equipment
- Built a field service force with more than 50 technicians
- Opened 20 inventory locations with over \$3 million in spare parts stocked
- Developed two 24/7/365 Operation and Monitoring Centers connected nationwide
- Opened two LNG plants and developed supply contracts with four others
- Purchased 58 LNG tankers making over 5,000 deliveries per year
- Trained over 30 dedicated LNG tanker truck drivers traveling over 2 million miles per year
- Built and operated one landfill-to-gas plant providing biomethane to the grid and to vehicles and is developing a second biomethane plant
