Mission

Compared to diesel and gasoline, natural gas fuel is cheaper, cleaner, and greener. It is sourced domestically with supplies projected to last 120 years. Clean Energy is committed to delivering the benefits of natural gas fuel to fleet operators across America. At the same time the company is dedicated to protecting the environment by promoting sustainable clean-fuel transportation solutions.

Comprehensive Natural Gas Fueling Services

Clean Energy offers operators of light, medium, and heavy-duty natural gas vehicle fleets:

- ∞ Natural gas fueling supply services
- ∞ Long-term fuel contracts and discounted fueling options
- ∞ Fuel station design, construction and ongoing operations
- ∞ Assistance with securing grant funding, vehicle leasing, and financial incentives

Production Facilities: LNG and Biomethane

Clean Energy owns and operates two LNG production plants, one in Willis, Texas and one in Boron, Calif., with combined capacity of 260,000 LNG gallons per day and designed to expand to 340,000 LNG gallons per day as needed. It also owns and operates a landfill gas facility in Dallas, Texas that produces renewable biomethane for the nation's pipeline network and Clean Energy's national network of CNG and LNG fueling stations.

Natural Gas Vehicle Conversions

Clean Energy owns BAF Technologies, Inc. of Dallas, Texas, a leading provider of natural gas vehicle systems and conversions for taxis, limousines, vans, pick-up trucks and shuttle buses.
