

# The world has changed, but our fuel has not.

## Natural gas fuel for transportation is still cheaper than diesel.

While oil costs less than last year, over 70% is still imported, threatening our national energy security. Natural gas fuel is still **all-American**. And we have a domestic supply estimated to last for more than a century.

Natural gas fuel is still **cleaner** than diesel or gasoline — over 20% lower greenhouse gas emissions.

And natural gas fuel is still **cheaper**, day after day — from 50 cents to a dollar or more less than diesel.

**Switch** to natural gas fuel for transportation. Call Chad Lindholm at 562-546-0322.
