Fleet Financing: The Clean Energy Solution

**Natural gas.
It's cleaner,
greener, cheaper,
and domestic.**

Clean Energy Finance provides financing solutions for natural gas fleet customers in the refuse, transit, trucking, shuttle, taxi and limousine industries. Our team has extensive leasing and financing experience to help lower the cost of acquiring these low emission vehicles. Clean Energy Finance has successfully guided many government and commercial entities towards their financial objectives.

Through the use of a low-interest-rate leasing program, we helped a large regional refuse operator quickly replace 30 of his older diesel collection trucks with new natural gas trucks that meet EPA emission standards. The customer was able to acquire his new compressed natural gas (CNG) trucks over a few months while saving thousands of dollars in lease payments and fuel. Plus, by switching to a natural gas fleet, the company was able to secure additional municipal refuse contracts.

By providing bridge and permanent financing, we enabled a regional trucking company to deploy new liquefied natural gas (LNG) trucks months ahead of schedule, in advance of waiting for local grants to be processed. This action enabled the

company to realize thousands of dollars in fuel savings and save a key contract with a large national retailer.

Our competitive leasing and financing programs allow airport groundside operators (such as offsite parking operators, hotel shuttles and rental car buses) to deploy new NGVs in a short timeframe, thereby helping airports across the nation meet their air quality goals.

Flexible financing options enable local governments and municipalities to "front load" their vehicle purchases while staying within their budget. Deploying natural gas vehicles at an earlier phase eliminates the inflated maintenance costs of older equipment and allows a municipality to recognize reduced maintenance expenses and lower fuel costs.

The Clean Energy Finance team can help your organization contribute to a better environment in a more efficient and cost-effective manner.

For more information on the Clean Energy fleet financing solution, call 562.493.2804.

Loans will be arranged or made pursuant to Department of Corporations California Finance Lenders License.
