Clean Energy Finance, a subsidiary of Clean Energy, provides fleets of individuals, businesses and government agencies with innovative, turnkey financing solutions to facilitate purchasing natural gas vehicles (NGV).

Our goal is to expand the market for NGVs by offering direct financing for vehicles, refueling capabilities and long-term fuel

contracts that are specifically customized to each client's transportation needs. CE Finance can also arrange financing with outside financial partners for larger governmental and commercial projects.

We provide finance packages and know-how to move NGV fleets on-line ahead of schedule. In fact, CE Finance can fund 100% of the deal cost up-front, so more capital is available for NGV infrastructure construction.

CE Finance can help clients acquire natural gas-powered heavy-duty and medium-duty trucks, transit buses, refuse vehicles, shuttle vans, and taxis with competitive terms. Our finance programs are individually configured to take advantage of grants and tax rebates.

At the helm of CE Finance, Peter Grace has extensive experience in the financing and leasing industry. His managerial and transactional resourcefulness has successfully guided many government and commercial entities towards their leasing objectives.

With new federal clean-air financial incentives available, CE Finance can help individuals and municipalities contribute to a better environment in a more efficient and cost-effective manner.
